Course

NSTC 067, Personal Protective & Life Saving Equipment Seminar

This course is based on OSHA CFR 1926.95 through 1926.107 of the construction industry regulations, Subpart E, Personal Protective and Life Saving Equipment. During the course, the student will become familiar with the 1926.95 through 1926.107 regulations criteria for personal protective requirements in construction. And will receive an overview of those topics needed to apply the proper personal protection equipment. This course will primarily be presented via the NASA Videoteleconferencing system and the instructor-led version of this class will only be available if combined with another course by the same instructor, if there are enough students to merit multiple presentations, or to meet special, urgent needs. Check with the NSTC management staff for determination.

Target Audience:

- Safety, Reliability, Quality, and Maintainability Professionals
- Construction Safety personnel.
- Managers who oversee operations.
- Those working on construction sites.

Dates:

Three classes

October 26, 2004
